Computer Science Undergraduate

+92 316 4259493 | akhnasfurqanabid@gmail.com | [LinkedIn](#) | [GitHub](#) | [akhnas-furqan.com](#) | Lahore, Pakistan

## PROFESSIONAL SUMMARY

BS Computer Science student at the University of Lahore with hands-on experience in C++, PostgreSQL, database design, and object-oriented programming through academic and personal projects. Strong foundation in data structures, algorithms, debugging, and problem-solving, complemented by effective communication and teamwork skills. Seeking internship opportunities in software development, data analytics, or AI-related domains to apply technical knowledge and contribute to real-world solutions.

## EDUCATION

|                                            |             |
|--------------------------------------------|-------------|
| BS Computer Science — University of Lahore | 2024 – 2028 |
| FSc — Punjab Group of Colleges             | 2021 – 2023 |
| Matriculation — Dar-e-Arqam Schools        | 2021        |

## SKILLS

|                       |                                                                                              |
|-----------------------|----------------------------------------------------------------------------------------------|
| Programming Languages | C++, SQL, Python                                                                             |
| Database Technologies | MySQL, PostgreSQL                                                                            |
| Tools                 | Git, GitHub, Visual Studio, VS Code, PyCharm                                                 |
| Core Concepts         | Data Structures & Algorithms, Database Systems, Data Algorithm Analysis, OOP, Logic Building |
| Soft Skills           | Attention to Detail, Clear Documentation, Team Collaboration, Communication, Adaptability    |
| Languages             | English (Proficient), Urdu (Native)                                                          |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                            |             |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Vehicle Dealership Database System — PostgreSQL / DSA, DB, DAA                                                                                                                                                                                                                                                                                                                                             | Spring 2026 |
| <ul style="list-style-type: none"><li>Designed and developed a relational vehicle dealership database system using PostgreSQL and database design principles.</li><li>Developed modules for vehicle inventory, customer management, and sales processing using normalized PostgreSQL schemas.</li><li>Improved query efficiency through indexing, normalization, and optimized SQL query design.</li></ul> |             |
| Library Management System — C++ / OOP                                                                                                                                                                                                                                                                                                                                                                      | Spring 2025 |
| <ul style="list-style-type: none"><li>Designed and developed a full-featured library management system using OOP principles.</li><li>Implemented book/user management, issuance, and return workflows.</li><li>Applied local encrypted storage for data security and memory efficiency.</li></ul>                                                                                                          |             |
| Tic Tac Toe Game — C++ / Programming Fundamentals                                                                                                                                                                                                                                                                                                                                                          | Fall 2024   |
| <ul style="list-style-type: none"><li>Built a console-based game with efficient game logic and structured control flow.</li><li>Designed a clean, text-based UI for improved user experience.</li></ul>                                                                                                                                                                                                    |             |

## KEY STRENGTHS

|               |                                                                       |
|---------------|-----------------------------------------------------------------------|
| Observation   | Detail-oriented with strong troubleshooting and accuracy skills.      |
| Communication | Able to explain technical concepts clearly to diverse audiences.      |
| Adaptability  | Quick learner who rapidly adopts new technologies and SDLC workflows. |
